Master Creative Design

It's a competitive world out there, and making a good first impression is vital to communicating your objectives and establishing relationships with prospective clients. That is why developing a professional image and eye-catching materials is an essential part of an effective marketing strategy.

Our design team works together to give your company an eye-catching brand to put you ahead of your competitors. From logos to print work to packaging, we deliver inspired, effective, intelligent work for your brand.

Master Creative Design is one of the top graphic design firms because we're drawn to projects that challenge our creativity and get us thinking outside the Cave.

Our design team works together to give your company an eye-catching brand to put you ahead of your competitors. From logos to print work to packaging, we deliver inspired, effective, intelligent work for your brand

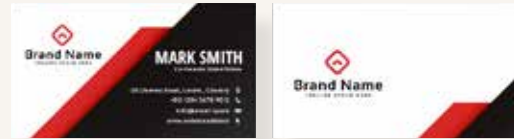

Logos and Branding

Effective branding does three things right away: it tells your audience who you are, what you do, and how you can help your customers. First impressions mean everything, and whether online or in print, you only have seconds to tell your audience why they should care. To stand out from the competition, you need effective branding and design that attracts customers at first glance, and serves to sell your products and services.

A LITTLE CARD SAYS BIG THINGS!

Business Cards & Letterhead

Don't underestimate the importance of these two pieces when building your corporate identity.

Print Design

If your company is going to print magazines, annual reports research, brochures or other documents you need effective graphics design to stand out from the competition and to make your print visible that attracts customers and audiences at first glance.

Master Creative Design will consult you about your print basic inputs or other resources for free.

Advertising

Whether it's for a magazine, trade show, or billboard, creative design plays a vital role in your advertising strategy, and we can create ads that speak for you.

Master Creative Design will consult you about your print basic inputs or other resources for free

Infographics Design

High-quality infographics are 30 times more likely to be read than text, so our designers understand how to convey ideas and data in the most visually appealing way.

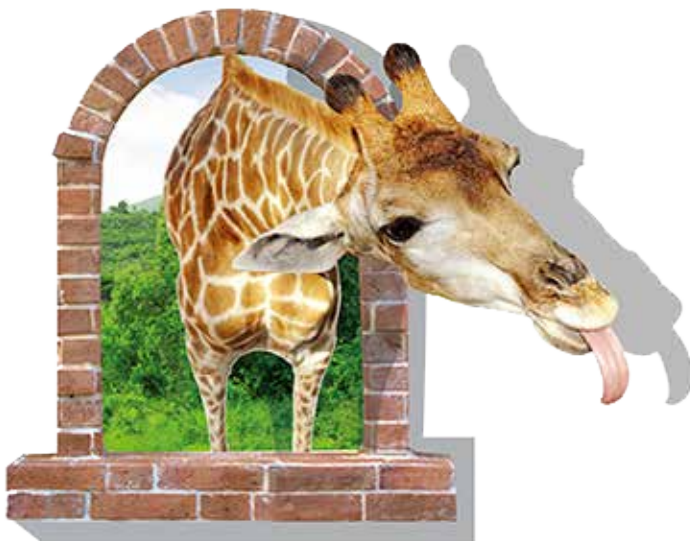

Presentation Design

Whether you're presenting for a client, training or leading a seminar, we'll make your information meaningful and visually attractive.

Web Graphics

From icons to images, our team designs beautiful elements that enhance the look of your site and are created in engaging ways for your audience.

Packaging Design

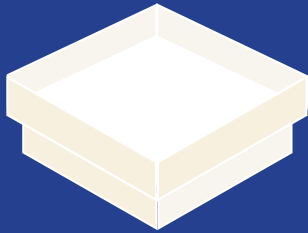

Whether you admit it or not, people do judge books by their cover and products by their package.

We can help you make a great first impression and be memorable.

Our skilled designers have the experience and creativity for best results through design. We gather information about your brand from the big picture to the little details and explore your objectives, so we can deliver creative solutions and the results you need.

We are pleased to tell you, quality design not only extends your brand it increases the effectiveness of your print pieces.

We prefer final output files for print projects to be constructed in Indesign. Master Printing design studio operate Macintosh computers running OSX. Illustrator and Photoshop files should be saved in CMYK colour mode; or EPS or TIFF in grayscale mode if applicable. Images saved in other formats such as RGB colour mode will require file editing to achieve expected results, which may incur additional charges.

Other software such as Word, Excel, PowerPoint, and Publisher are designed for print to desktop office printers, and do not have the necessary colour and image handling capabilities to provide the file in the correct way for professional print quality results. Digital files provided using these formats produce RGB documents, and often use JPEG low-resolution images.

When supplying original native files to Master printing Press please package to include the following:

- All scans in CMYK colour mode (minimum 300dpi at actual size)
- All fonts used in the document(s)
- All logos and linework illustrations used in the job (saved as outlines in Adobe Illustrator)
- Minimum 10mm bleed where applicable
- Provide a hard copy printed mock-up of the document for quality control purposes

Print-ready high resolution PDF should be supplied as:

- CMYK images only in the original document, (not RGB) scanned at minimum 300dpi at final size
- Only include spot colours for inks intended to be printed that way
- Crop marks only (colour bars and centre marks not required)
- 10mm Bleed (3mm minimum)
- Image centred on the document page, in single pages (not imposed)
- Saved for Acrobat 4 or higher, with all editing capabilities preserved
- All fonts must be embedded
- Colour and grayscale bitmap images to an average downloading sample of 400dpi
- No security settings
